ABOUT ME

I am a Software Engineer with extensive experience in development using C#, .NET, TypeScript, Angular, and SQL Server.

Currently, I am in the final semester of my Software Engineering degree.

I am driven by challenges, and my journey began as a delivery driver.

In addition to my career in technology, I am an amateur triathlete, always striving to push my limits and achieve new goals.

My journey is characterized by determination and a constant pursuit of personal and professional growth.

PROJECTS

Task Manager Pro

EDUCATION

Estácio de Sá University

Bachelor's Degree in Software Engineering

Expected Graduation: June 2025

CAREER

Software Engineer, Target Sistemas - Jan/2024 - Present - Remote, Brazil

Development and support in the financial area using key technologies: C#, .NET, TypeScript, SQL Server.

- I was part of the support team and contribute to analyzing CNAB 400/240 and JSON files, depending on bank integration, to better understand the reasons for settlements, liquidations, protests, or any responses given by the bank and processed by the ERP.
- I contribute to implementations and banking integrations.
- Integrations with banks such as Banco do Brasil and Itaú.
- I also work on tasks that are part of the modernization of the legacy system, focusing on transitioning features from the old technology to the new one, such as migrating from Centura to C# and Angular

Software Engineer, RF Technology - Dec/2024 - Present - Remote, Brazil

Development of tests using Xunit and system development with C# and Angular.

- I developed and implemented tests for a project with Drag-and-Drop functionality, ensuring the usability and stability of the feature. I worked on scenario validation, identifying potential issues with a focus on application reliability.
- I am part of a team allocated to an international client in Florida, delivering sprint tasks. Most of the assignments are focused on testing with Xunit. The client is a confidential company in the digital products and Artificial Intelligence sector.

Software Engineer, I-Dutto - Mar/2023 - Nov/2023 - Remote, Brazil

Development of web applications using ASP.NET/C#, Angular, and SQL Server.

- User Interface Enhancement: I actively contributed to improving the user interface for a client in the transportation sector, resulting in an enhanced workflow. We received positive feedback from the client.
- Email System Innovation: I introduced an innovative feature in one of the internal systems, transforming the email sending process. The implementation eliminated the direct coding of recipients in the system, making it more efficient, flexible, and easier to maintain.
